Gary

Greg H is on travel representing the US at the Basel Meeting in Switzerland. He will be back in the office on Monday.

While I can look over these, to the extent you want/need Greg, it's going to need to wait til next week.

Region 2, with the approval of both ORCR and ORD, sent to AES a copy of the draft ORD report "Leaching Behavior of Agremax Collected from a Coal-Firing Power Plant in Puerto Rico" in November 2012. AES, after reviewing that report, sent Region 2 its comments in January 2013. Region 2 forwarded a copy of those comments to you.

When AES learned in early April 2013 that the ORD draft report had been finalized in December 2012 without even waiting for comments from AES, AES sent its letter of April 11 to Region 2. After speaking to Greg Helms, Region 2 responded to that April 11 letter in an email dated April 18, 2013, and AES countered with its own email of April 23, 2013. I have attached copies of those three emails.

I am writing to you seeking your assistance in addressing the concerns that AES has raised in its April 11 and 23 emails. Thank you.

Gary H. Nurkin  
Assistant Regional Counsel  
Waste & Toxics Substances Branch  
U.S. Environmental Protection Agency-Region 2
